THE INSTITUTE OF ORTHOPAEDIC MANUAL THERAPY

WEEKEND COURSE: September 2023

Cervical-Thoracic Course

September 23rd and 24th

Saturday 8am-5pm
Sunday 8am-12pm

Current research has confirmed that a combination of manual therapy, therapeutic exercises and patient education is the cornerstone of physical therapy treatment for patients with spinal dysfunction. It can be difficult during daily practice to decide on optimal clinical decision making. Our Weekend Seminars are aimed to provide a snapshot view of orthopaedic manual therapy, facilitate thought processes, and reinvigorate licensed physical therapists' skill sets.

Where:

ProFysio Physical Therapy
1077 Route 34
Aberdeen NJ 07747
